

**CLAIMS**

1.- Preparation for veterinary use, characterised  
in that it includes at least one keratolytic and  
5 cerumenilytic cleaning agent, at least one bactericide  
agent, at least one yeast control agent and at least  
one anti-irritant and anti-pruriginous agent.

2.- Preparation according to claim 1,  
10 characterised in that it also includes at least one  
agent that enhances its cerumenilytic properties.

3.- Preparation according to either of the  
previous claims, characterised in that it also includes  
15 at least one vegetable extract with antiseptic and  
cicatrizant properties.

4.- Preparation according to any of the previous  
claims, characterised in that it also includes at least  
20 one deodorant agent.

5.- Preparation according to any of the previous  
claims, characterised in that the agent with  
keratolytic and cerumenilytic cleaning effects is  
25 lactic acid, salicylic acid or a mixture of the two.

6.- Preparation according to any of the previous  
claims, characterised in that the bactericide agent is  
*Cetraria islandica* extract.

30

7.- Preparation according to any of the previous  
claims, characterised in that the yeast control agent  
is lactic acid, salicylic acid or a mixture of the two.

35 8.- Preparation according to any of the previous

claims, characterised in that the anti-irritant and anti-pruriginous agent is a *Cucumis sativus* vegetable extract.

5           9.- Preparation according to any of the previous claims, characterised in that the agent that enhances the cerumenolytic effect is oleic acid.

10           10.- Preparation according to any of the previous claims, characterised in that the vegetable extract is *Mimosa tenuiflora* extract, *Cetraria islandica* extract, *Camomilla recutita* extract or a mixture of them.

15           11.- Preparation according to any of the previous claims, characterised in that the deodorant agent is *Cetraria islandica* extract.

20           12.- Preparation according to any of claims 1 to 11, characterised in that it includes between 65 and 80% weight of propylene glycol or butylene glycol, or a mixture of both; between 10 and 15% weight of polyethylene glycol 400; between 2 and 10% weight of ethoxydiglycol; between 1 and 5% weight of de-ionised water; between 2 and 5% weight of glycerine of  
25           diglycerol, or a mixture of both; between 1 and 4% weight of lactic acid; between 1 and 6% weight of *Cucumis sativus* extract, *Cetraria islandica* extract, *Mimosa tenuiflora* extract and/or *Camomilla recutita* extract, or a mixture of them; between 0.1 and 0.5%  
30           weight of oleic acid; and between 0.1 and 0.5% weight of salicylic acid.

13.- Use of the preparation according to claims 1 to 11 for obtaining otic drugs for veterinary purposes.
